

ANUBIS 3D

Anubis 3D Industrial Solutions unveils its new enhanced End of Arm tooling line of products for the first time at Pack Expo 2024.

FOR IMMEDIATE RELEASE

Mississauga, Ontario – Feb 16, 2024, Anubis 3D Industrial Solutions Inc. is set to showcase the next generation end effectors at Pack Expo East 2024 in Philadelphia, held from Mar 18 to Mar 20 at the Pennsylvania Convention Center. Anubis 3D, known for its innovative solutions for Automation, is once again poised to lead the way with its latest End-of-Arm tooling products.

Visitors to our booth can expect to experience firsthand our newest advancements in lightweight tooling. From Carton Erectors, Bottle Grippers, Area Surface Grippers, Manual or fully integrated Tool Changers to mention a few. All fabricated using Advanced Additive Manufacturing and ingenious designs. Most of our tooling design is based upon a modular system, which provides flexibility to rapidly configure a specific solution. Our showcase presents ready solutions, with multiple variations to suit factory challenges such as tight space, or rapid changeovers, tooling with dual functionality that saves cost and reduces downtimes.

In addition to our product unveilings, attendees can look forward to demonstrations, insightful industry talks, and exclusive hands-on experiences with our team. This year's Pack Expo East is not to be missed, and Anubis 3D stands ready to deliver solutions for automation. Our focus and expertise are in the food & beverage, pharma, and consumer goods industries.

"We are thrilled to be part of Pack Expo East for the first time," says Tharwat Fouad, President and Engineering Director. "Our team has poured countless hours into designing and testing our tooling solutions which will redefine expectations and set new standards for the industry. We can't wait to share our experience and solutions with you."

Join us at booth 2033 and be among the first to witness the Next Generation End Effectors. Step into a new experience where innovation knows no bounds, and let Anubis 3D be your trusted partner and supplier for the next Automation project.

Anubis 3D is an industrial design/engineering company that manufactures 3D-printed components and mechanical or pneumatic end effectors for industrial and collaborative robots. What differentiates our products from others is their lightweight, innovative designs, ease of use, flexible configurations, and low inertia, enabling robots to run efficiently.

We manufacture standard products such as Surface Grippers for palletizing, Automated Pick and Pick-and-place bottle Grippers, and Automated Carton Erectors for the packaging industry.
